

SCCI1605 Accessible Information: Terminology (as at 03.07.15)

Explanatory note

SCCI1605 Accessible Information has defined four new subsets, listed within the [Data Dictionary for Care \(dd4c\)](#), with associated data items available in SNOMED CT, Read v2 and CTV3. The four subsets are:

[Accessible information - communication support](#)

[Accessible Information - requires communication professional](#)

[Accessible Information - requires specific contact method](#)

[Accessible Information - requires specific information format](#)

In addition, four new data elements have been added to the [NHS Data Model and Dictionary](#) to support SCCI1605 Accessible Information, under a new Accessible Information category. As follows:

- “ACCESSIBLE INFORMATION COMMUNICATION SUPPORT CODE (SNOMED CT) is the SNOMED CT concept ID which is used to identify that the PATIENT requires support (aids/equipment/adjustments) to enable communication.”
- “ACCESSIBLE INFORMATION CONTACT METHOD CODE (SNOMED CT) is the SNOMED CT concept ID which is used to identify that the PATIENT requires a different or specific contact method.”
- “ACCESSIBLE INFORMATION PROFESSIONAL REQUIRED CODE (SNOMED CT) is the SNOMED CT concept ID which is used to identify that the PATIENT requires support from a communication professional.”
- “ACCESSIBLE INFORMATION SPECIFIC INFORMATION FORMAT CODE (SNOMED CT) is the SNOMED CT concept ID which is used to identify that the PATIENT requires information in a specific format.”

Further information about clinical architecture / terminology is included in the Specification.

Current SNOMED CT, Read v2 and CTV3 codes associated with the four subsets are listed below, along with synonyms. ‘R’ indicates that a request has been made for development of this data item in the relevant terminology with the provisional code given (in brackets). FSNs and synonyms are not case-sensitive (although Read codes are).
