Mr X	10744	NHS Derby & Derbyshire CCG (DDCCG)	To implement effective multi-agency management of patients that may present long-term risks.	The panel recommend an inter-agency collaboration facilitated by NHS Derby & Derbyshire CCG, with representation by a senior clinician and senior manager from the Trust and a senior case worker and senior manager from Derventio Housing Trust and other organisations with a stake in housing service users such as Mr X.	31/05/2021	Blue
	10744	NHS Derby & Derbyshire CCG (DDCCG)	To implement effective multi-agency management of patients that may present long-term risks.	The expected outputs from the interagency collaboration are expected to include a quality improvement programme which will: - Produce, implement, and monitor an agreed protocol for interagency working. - Analyse systemic factors impeding joint working and address these, including the use of software for remote working, which has become common practice. - Focus on risk management and information sharing, with relevance to times of transition between levels of care. - Agree a process for ongoing monitoring and reporting to ensure progress is maintained.	Completed 1/2/2022	Blue
	10745	Community Mental Health Division / service	To review and standardise the role of the Care Co-ordinator.	A quality improvement programme around this role should be developed to promote good practice.	31/05/2021	Blue

	10746	NHS Derby & Derbyshire CCG (DDCCG)	<p>To consider the need for development of a dedicated community forensic team and high support hostel for the population of Derbyshire. This would be informed by a needs analysis of the current Derbyshire patient population in secure mental health services commissioned by NHS England and a projection of those held in the criminal justice system considered to have a profound mental health need.</p>	<p>Using a needs-led approach, develop a business case informed by current data to identify the population. Consider options available to best serve this population to reduce risk, assist through put and provide best value for money. Liaise with project lead for IMPACT (the provider led care collaborative for the East Midlands) to ensure plans are compatible. In liaison with third sector providers, consider options for the development of a high support hostel for patients who require on-going 24-hour support post discharge due to their clinical histories and risk profiles.</p>	31/05/2021	Blue
